INDEX TO VOLUME L

Abrasion following wind scouring, Arnott moraine, Wisconsin (L. R. Thiesmeyer and R. E. Digman), 184

Adamellite group of intrusives about Nain, Labrador (E. P. Wheeler, 2nd), 619

Adsorbed cations, influence of, on water film (R. E. Grim), 271

Adsorptive properties of clay minerals (R. E. Grim), 252

Age of Asotin stage, Snake River Canyon, Idaho (R. L. Lupher and W. C. Warren), 878
relations of anorthositic rocks, Nain, Labrador (E. P. Wheeler, 2nd), 632

Agents for transporting sediments, density currents as: studies for students (H. S. Bell), 512

Agriculture, modern clay researches in relation to (W. P. Kelley), 307

Alden, W. C. Review of The last million years: a history of the Pleistocene in North America. By A. P. Coleman. Edited by George F. Kay, 331

Alkali feldspars in Tasmanian dolerites (A. B. Edwards), 590

Alkalic rocks, origin of, in Poohbah Lake area, Ontario (C. C. Allen), 148
syenites in Poohbah Lake area, Ontario (C. C. Allen), 143

Allen, C. C. *The malignites of Poohbah Lake, Ontario*, 134

Allensville conglomerate member, Pretty Run sandstone facies (F. T. Holden), 58

Allophane (R. E. Grim), 234

American influence in Canadian mining. By E. S. Moore. Review by E. S. Bastin, 218

Amphibian, Edops, a primitive rhachitomous, from the Texas red beds (A. S. Romer and R. V. Witter), 925

Amphibole in Tasmanian dolerites (A. B. Edwards), 592

Analyses of rocks from Poohbah Lake, Ontario (C. C. Allen), 146

Annual reports of the Iowa Geological Survey, 1934–1939, with accompanying papers. Review by R. T. Chamberlin, 918

Anorthosite and associated rocks about Nain, Labrador (E. P. Wheeler, 2nd), 611

Anorthositic gabbro-diorite group near Nain, Labrador (E. P. Wheeler, 2nd), 613

Antevs, E. Cited on stratigraphy of Great Lakes region (R. F. Flint), 574

Apatite in Tasmanian dolerites (A. B. Edwards), 593

Aplite in Poohbah Lake area, Ontario (C. C. Allen), 145

Appalachian physiography, a study in (Karl Ver Steeg), 504

Appalachians, structure of Little North Mountain of the north-central (A. W. Giles), 961

Appendicular skeleton of Edops, Texas red beds (A. S. Romer and R. V. Witter), 953

Applications of modern clay research in ceramics (F. H. Norton), 320
of modern clay researches in construction engineering (H. F. Winterkorn), 291

Arctic glacial research (R. F. Flint), 577

Argillaceous materials, miscellaneous (R. E. Grim), 261

Arizona, multiple Pleistocene glaciation on San Francisco Mountain (R. P. Sharp), 481

Armstrong member, River Styx conglomerate facies, Ohio (F. T. Holden), 50
sandstone member, Killbuck shale facies, Ohio (F. T. Holden), 49

Arni, P. Sarkî Anadolu ve Mücavir Mintakalarin Tektonik Ana Hatlari: Tektonische Grundzüge Ostanatoliens und benachbarter Gebiete. Review by R. T. Chamberlin, 668

Ashley, G. H. Cited on Appalachian physiography (Karl Ver Steeg), 504 ff.

Asotin Canyon, Idaho (R. L. Lupher and W. C. Warren), 871

stage of Snake River Canyon, Idaho (R. L. Lupher and W. C. Warren), 870
age of (R. L. Lupher and W. C. Warren), 878
physiographic and stratigraphic implications of (R. L. Lupher and W. C. Warren), 880
stage, the, of the Snake River Canyon near Lewiston, Idaho (R. L. Lupher and W. C. Warren), 866
Associated rocks, anorthosite and, about Nain, Labrador (E. P. Wheeler, 2nd), 611
Atomic structure of pyroxenes in Tasmanian dolerites (A. B. Edwards), 597
Attapulgite (R. E. Grim), 234
structure (R. E. Grim), 249
Auckland, New Zealand, unusual olivine in basalt near (J. A. Bartrum), 914
Augite in Tasmanian dolerites (A. B. Edwards), 584
Australia. By Griffith Taylor. Review by C. W. Sternberg, 224
Axial skeleton of Edops, Texas red beds (A. S. Romer and R. V. Witter), 951

Backlund, H. G. Cited on mode of intrusion of deep-seated alkaline bodies (C. C. Allen), 150
Bahr, Adolf. Cited on involution layers (R. P. Sharp), 122
Cited on mechanics of formation of involutions (R. P. Sharp), 130
Baker, George. *Sand stalagmites*, 662
Banded and nonbanded coals (G. H. Cady), 339
Bannock volcanic formation, Idaho (J. C. Ludlum), 88
Barrell, Joseph. Cited on Elkhorn Mining District, Montana (C. C. Allen), 142
Bars, the building of (O. F. Evans), 849
spits, and related structures, the origin of (O. F. Evans), 846
Bartrum, J. A. *Unusual olivine in basalt near Auckland, New Zealand*, 914
Basalt, unusual olivine in, near Auckland, New Zealand (J. A. Bartrum), 914
Base exchange and minerals of the montmorillonite group (S. B. Hendricks), 285
Base-exchange capacity of clay minerals (R. E. Grim), 250
material in soils (W. P. Kelley), 311
Bastin, E. S. Review of American influence in Canadian mining. By E. S. Moore, 218
Baver, L. D. Soil physics. Review by W. C. Krumbein, 669
Bedford formation, Ohio (F. T. Holden), 34
Behavior of density currents (H. S. Bell), 528
Bell, Hugh Stevens. *Density currents as agents for transporting sediments: studies for students*, 512
Berea formation, Ohio (F. T. Holden), 38
Berne conglomerate member, Pretty Run sandstone facies, Ohio (F. T. Holden), 55
Binary system $NaAlSiO_4$-$CaSiO_3$ (W. R. Foster), 158
$NaAlSiO_4$-$NaAlSi_3O_8$ (W. R. Foster), 157
Biotite in Tasmanian dolerites (A. B. Edwards), 591
Birch, Francis, *et al.* Handbook of physical constants. Review by R. T. Chamberlin, 670
Bituminous coals, types of, on basis of megascopic criteria (G. H. Cady), 339
Black Hand conglomerate member, Hocking Valley facies, Ohio (F. T. Holden), 46
conglomerate member, Toboso facies, Ohio (F. T. Holden), 48
sandstone member, River Styx conglomerate facies, Ohio (F. T. Holden), 50
shale member, Killbuck shale facies, Ohio (F. T. Holden), 49
siltstone member, Granville shale facies (F. T. Holden), 46
Blackrock limestone, Pocatello, Idaho (J. C. Ludlum), 92
Blue Mounds region, Wisconsin (J H. Bretz), 783
Blytt-Sernander hypothesis, a climatic sequence based upon peat layers and plant fossils (W. S. Cooper), 983
Botanical science, contributions of, to the knowledge of postglacial climates (W. S. Cooper), 981
Bowen, N. L. Cited on evaluation of igneous rocks (C. C. Allen), 151
Boxwork in caves (J H. Bretz), 733
Branson, Carl C. Review of Wissenschaftliche Ergebnisse der Nieder-

ländischen Expeditionen in den Karakorum und die Angrenzenden Gebiete 1922, 1925, 1929–30, und 1935 herausgegeben von Dr. Ph. C. Visser und Jenny Visser-Hooft. By Rudolf Wyss, 109

Breccia, chemical analysis of, Sudbury, Ontario (H. W. Fairbairn and G. M. Robson), 17
at Sudbury, Ontario (H. W. Fairbairn and G. M. Robson), 1

Breccias, classification of, Sudbury, Ontario (H. W. Fairbairn and G. M. Robson), 5
other, of Sudbury, Ontario, type (H. W. Fairbairn and G. M. Robson), 32

Bretz, J Harlen. Cited on origin of Mima mounds, Washington (W. W. Dalquest and V. B. Scheffer), 82
Earth sciences. Review by A. C. Swinnerton, 110
Vadose and phreatic features of limestone caverns, 675

Bright coal (C. E. Marshall), 387

Bucher, Walter H. Review of Report of the Subcommittee on the Ecology of Marine Organisms, 922

Buena Vista sandstone member, Scioto Valley shale facies, Ohio (F. T. Holden), 60
Vanceburg siltstone facies, Ohio (F. T. Holden), 62

Burbank member, Killbuck shale facies, Ohio (F. T. Holden), 49

Butts, C., and R. S. Edmundson. Cited on geology of Little North Mountain, Appalachians (A. W. Giles), 963 ff.

Byer sandstone member, Pretty Run facies, Ohio (R. T. Holden), 56

Cady, Gilbert H. *Modern concepts of the physical constitution of coal*, 337

Cain, S. A. Cited on pollen analysis as a paleo-ecological research method (W. S. Cooper), 984

Calcite in Tasmanian dolerites (A. B. Edwards), 592

Cambrian (?) and post-Cambrian deposits, Grand Canyon, Arizona (E. T. Schenk and H. E. Wheeler), 896
sequence in western Grand Canyon, Arizona (E. T. Schenk and H. E. Wheeler), 882

Cameron Cave, Missouri, the network of (J H. Bretz), 700
vadose alteration of phreatic passages in (J H. Bretz), 743

Campanian sediments, Palestine (H. A. Lowenstam), 840

Cannel (E. C. Dapples), 446
and boghead coals (G. C. Sprunk), 420

Cannels (G. H. Cady), 346

Canyon, the Snake River, near Lewiston, Idaho, the Asotin stage of (R. L. Lupher and W. C. Warren), 866
western Grand, Arizona, Cambrian sequence in (E. T. Schenk and H. E. Wheeler), 882

Carbonization, chemical, and hydrogenation, properties, influence of physical constitution of coal upon its (G. C. Sprunk), 411

Carlsbad Cavern, New Mexico, floor pockets of (J H. Bretz), 711
and Slaughter Canyon Caverns, New Mexico, history of (J H. Bretz), 777

Carnegieite (W. R. Foster), 156

Casting process of molding ceramics (F. H. Norton), 325

Castings slips (F. H. Norton), 323

Catalogue, a, of the foraminifera. By Brooks F. Ellis and Angelina R. Messina. Review by Carey Croneis, 560

Cation replaceability of clay minerals (R. E. Grim), 254

Cave chambers extended along the dip (J H. Bretz), 755
solution related to stylolite seams (J H. Bretz), 735

Cavern making in erosion cycle (J H. Bretz), 782

Caverns, vadose and phreatic features of limestone (J H. Bretz), 675

Caves in phreatic zone today (J H. Bretz), 807
in tilted formations (J H. Bretz), 754

Ceiling pockets in caves (J H. Bretz), 711
tubes and half-tubes in caves (J H. Bretz), 717

Cenomanian rocks, Eastern Nazareth Mountains, Palestine (H. A. Lowenstam), 819

Ceramic molding methods (F. H. Norton), 324

Ceramics, applications of modern clay research in (F. H. Norton), 320
Chamberlin, Rollin T. Review of Annual reports of the Iowa Geological Survey, 1934–1939, with accompanying papers, 918
Review of Crater Lake; the story of its origin. By Howel Williams, 220
Review of Handbook of physical constants. Edited by Francis Birch *et al.*, 670
Review of Outlines of structural geology. By E. Sherbon Hills, 923
Review of Sarkî Anadolu ve Mücavir Mintakalarin Tektonik Ana Hatlari: Tektonische Grundzüge Ostanatoliens und benachbarter Gebiete. By P. Arni, 668
Review of The structure of the Kejser Franz Josephs Fjord region, northeast Greenland. By N. E. Odell, 334
Chambers, cave along the strike (J H. Bretz), 759
Chaney, R. W. A Miocene flora from Shantung Province, China (E. P. Du Bois), 223
Characteristics, chemical, relation of the physical constitution of coal to its (H. H. Lowry), 357
Chemical analyses of types of coal (G. C. Sprunk), 415
analysis of breccia, Sudbury, Ontario (H. W. Fairbairn and G. M. Robson), 24
characteristics, relation of the physical constitution of coal to its (H. H. Lowry), 357
hydrogenation, and carbonization properties, influence of physical constitution of coal upon its (G. C. Sprunk), 411
individuality of the physical components of coal (G. H. Cady), 353
relations of Poohbah stock, Ontario (C. C. Allen), 145
Chisholm shale, Grand Canyon, Arizona (E. T. Schenk and H. E. Wheeler), 892
Chlorite in Tasmanian dolerites (A. B. Edwards), 591
Chloritic mica (R. E. Grim), 235
structure (R. E. Grim), 250
Churn Creek member, Vanceburg siltstone facies, Ohio (F. T. Holden), 63
Clarain (G. H. Cady), 345
(E. C. Dapples), 445
Classification of breccias, Sudbury, Ontario (H. W. Fairbairn and G. M. Robson), 5
of coals, technique of (G. H. Cady), 350
and composition of clay minerals (R. E. Grim), 231
physical constitution of coal as related to description and (E. C. Dapples), 437
Clay filling, the epoch of, in cave history (J H. Bretz), 773
materials, modern concepts of (R. E. Grim), 225
mineral, types of (F. H. Norton), 329
mineral concept (R. E. Grim), 228
minerals—base exchange (R. E. Grim), 250
minerals, classification and composition (R. E. Grim), 231
minerals, formation of (W. P. Kelley), 314
minerals—reduction of particle size on agitation in water (R. E. Grim), 262
minerals of soils (W. P. Kelley), 312
minerals in soils, importance of (W. P. Kelley), 317
research, modern, in ceramics, applications of (F. H. Norton), 320
researches, applications of modern, in construction engineering (H. F. Winterkorn), 291
researches, modern, in relation to agriculture (W. P. Kelley), 307
variables, control of, in clay processes (F. H. Norton), 330
variables in, that influence the molding properties (F. H. Norton), 328
-water system (R. E. Grim), 263
system (F. H. Norton), 320
Clays and their treatment (F. H. Norton), 326
Climates, postglacial, contributions of botanical science to the knowledge of (W. S. Cooper), 981
Coal, hydrogenation properties of types of, and their constituents (G. C. Sprunk), 429
influence of physical constitution of, upon its chemical, hydrogenation, and carbonization properties (G. C. Sprunk), 411
modern conceptions of the physical constitution of, and related research in Great Britain (C. E. Marshall), 385
modern concepts of the physical constitution of (G. H. Cady), 337

paleobotany. By Reinhardt Thiessen and George C. Sprunk. Review by E. P. Du Bois, 1005
petrographic types of (G. C. Sprunk), 412
physical constitution of, as related to coal description and classification (E. C. Dapples), 437
preparation, practical significance of the physical constitution of coal in (L. C. McCabe), 406
processing (G. H. Cady), 355
rank and physical constitution of (C. E. Marshall), 401
rank and type of (G. C. Sprunk), 412
study, technique of (G. H. Cady), 349
types and constituents (C. E. Marshall), 386
types and constituents, petrological classification of (C. E. Marshall), 395
types, primary (E. C. Dapples), 439
